IZARO GONDRA

# References

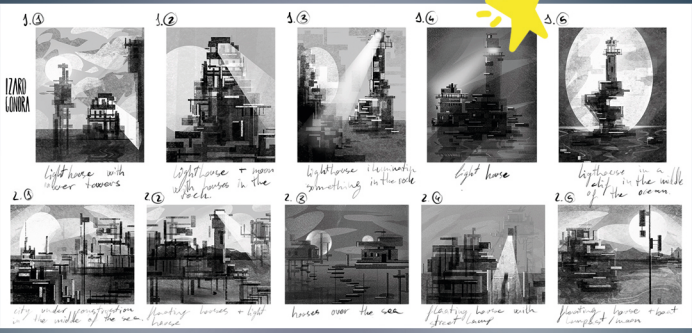

# •Tonal Thumbnails

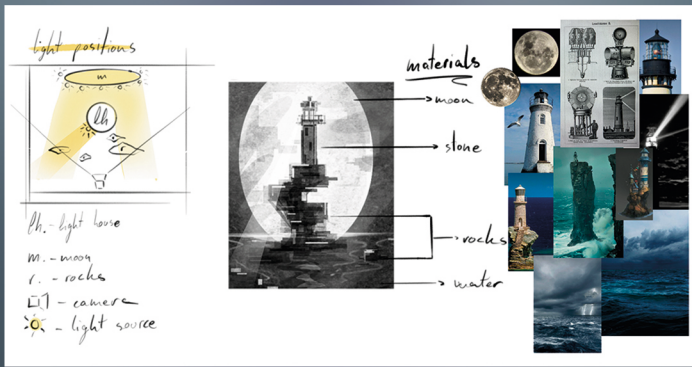

I liked how they were turning out and decided to keep 4 and 8 to do some iterations.

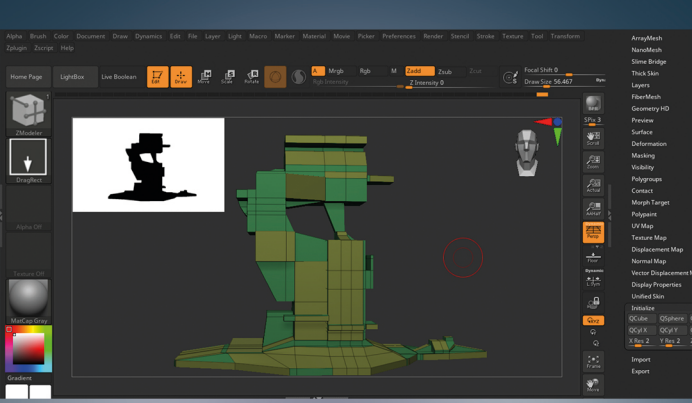

# Tonal thumbnails Iterations

I choose to continue with the 1.5 option and did some research about possible materials and lighting positions

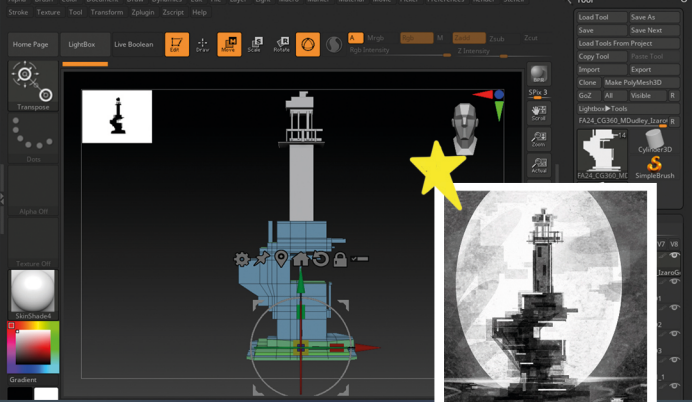

# First Model of the base of the Lighthouse

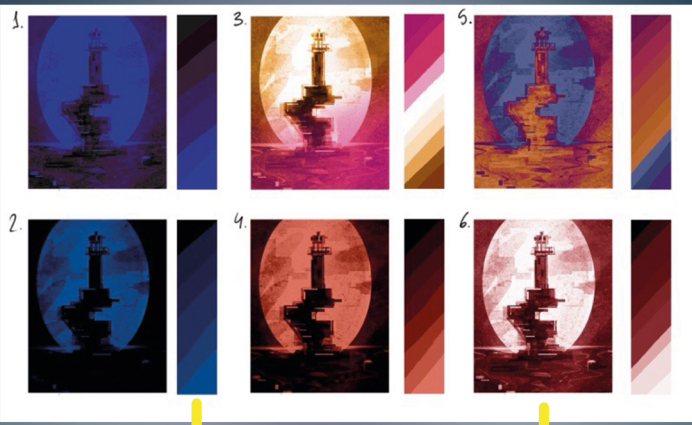

It was a good begginninng but
it didn't looked like the one
on the thumbnail

# New model

This second model was much more similar to the original concept

# Some color studies

I decided I wanted to go for number 2s color palette but with 6s contrast

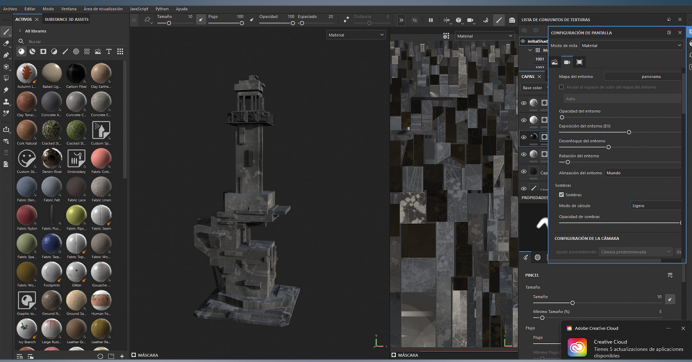

# First Renders

# Textures:

- I tried the textures to look as alike to the concept as possible by using similar brushes

# Moon renders...

I worked on the moon material to make it glow

# Playing with the Lights:

I liked the contrast of the first one, but it was difficult to read

FINAL RENDER

RAW
